

LINGEA

Lingea Translator

NEW-GENERATION MACHINE TRANSLATOR

- Do you need fast and inexpensive translations?* 1.
- Do you analyze data in multiple languages?* 2.
- Do you want to improve communication between your foreign branches?* 3.
- Do you keep multiple language versions of web sites?* 4.
- Do you provide technical support in different languages?* 5.

Lingea Translator

Thanks to new cutting-edge methods, machine translation tools are able to provide translations of previously unthinkable quality. In some areas, they are even able to replace human translators.

Lingea has engaged in this field for many years and has been achieving results which compare favorably with the best solutions from global companies such as Google or Microsoft.

**WE OFFER
SOLUTIONS
FOR THESE
LANGUAGES:**

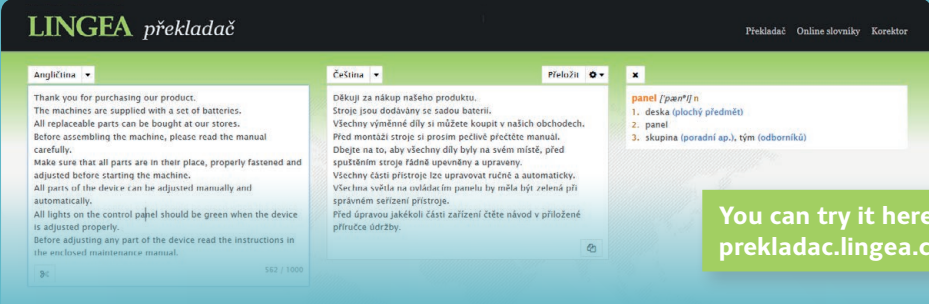

**ENGLISH
GERMAN
RUSSIAN
FRENCH
SPANISH
ITALIAN
CZECH
POLISH
SLOVAK
HUNGARIAN**

MAIN ADVANTAGES OF LINGEA TRANSLATOR

- High translation quality based on artificial intelligence and neural networks
- MT engines are directly adaptable to specific technical texts from a specific field
- MT engines can be deployed on site (at the customer's place) for increased data safety
- It can be integrated directly into web applications, information systems and DMS
- It preserves the original format of translated documents
- MT engines, dictionaries and proofreading tools supplied by a single company for higher work efficiency

MACHINE TRANSLATORS BRING NEW POSSIBILITIES

1. Significant reduction in translation costs
2. Instant availability of relevant information in foreign languages
3. Improved communication between workers in different countries
4. Automated translation of web site content into other languages
5. Increased efficiency and partial automation of technical support
6. Multilingual search for relevant information

The screenshot shows the LINGEA translator web application. The header includes the logo 'LINGEA překladač' and navigation links 'Překladač', 'Online slovníky', and 'Korektor'. The interface is divided into three main sections: a source text area on the left (English), a target text area in the middle (Czech), and a dictionary panel on the right. The English text describes product instructions for a machine, mentioning batteries, assembly, and safety. The Czech text is the translated version. The dictionary panel shows the translation of the word 'panel'.

You can try it here:
prekladac.lingea.cz

Use the Translator simultaneously with the dictionary. Combining instant translation of sentences and verification of terms in the dictionary is the ideal solution to correct understanding of texts in a foreign language.

OTHER LINGEA LANGUAGE TOOLS

LINGEA has been developing language applications for over 20 years now and we have created a whole range of helpful applications and components which make people's lives easier:

- On-line dictionaries at dict.com or slovník.seznam.cz
- Off-line dictionaries for professional use: **Lingea Lexicon**
- **Spellcheckers** implemented in MS Office, Adobe InDesign, AutoCAD and other
- **Morphological analyzers** for 30 languages
- Multilingual **full text** search
- Automatic **completion of diacritics**
- **Speech synthesis**

All of the above tools can be combined with the LINGEA Translator thus further extending the scope of its use.

LINGEA

Lingea has been developing language technologies and applications since 1997. We currently operate in the Czech Republic, Slovakia, Poland, Hungary, Romania, Slovenia and Serbia. Our language tools, applications and data are used by millions of people worldwide.
